

DATAWATCH SYSTEMS®
GUARDWATCH®

Give your security staff greater control over access and safety in your building. Allows guards to monitor alarms, secure or unlock doors and elevators and lockdown the perimeter in an emergency.

FEATURES & BENEFITS

- GuardWatch® is part of the Total Lobby Solution developed by Datawatch Systems. Developed jointly with Admiral Security Services—a sister company of Datawatch Systems—GuardWatch® gives your security staff greater control over access and safety in your building.
- Guards monitor real-time alarms throughout the building and optionally monitor alarms from other properties. If a guard doesn't acknowledge an alarm, GuardWatch® will automatically forward the alarm to Datawatch Central Station for resolution.
- Monitor real-time access card activity. If someone runs a card on the 11th floor at 2am, GuardWatch® alerts security so they can investigate.
- Guards are able to secure and unsecure doors with a simple click of a mouse. It's easy to let in a tenant who forgot their card, or keep doors open for events that run past normal business hours.
- In an emergency, a click of a mouse can lock down all perimeter doors.
- Search for and view card holders, registered visitors, access events and alarms. Track down the owner when a lost card is found.
- Cloud-based GuardWatch® fully integrates with your Datawatch access control system. It is configurable, so you can specify what your security staff can control.
